

Australian Grain Industry meeting UN Sustainability Goals

AUSTRALIAN GRAIN INDUSTRY Safe, Secure, Reliable, Sustainable

UN Goals Australian Grain Industry Capability

<p>1 NO POVERTY</p>	<ul style="list-style-type: none"> Safety and wellbeing of our people are paramount across industry. Australian Legislation, regulations, and the grain sector's social conscious are supportive and attuned to this UN Goal
<p>2 ZERO HUNGER</p>	<ul style="list-style-type: none"> The trade and movement of grain from where it is produced to where it is needed is an essential component of global food security. Grain industry frameworks ensure a safe food product, a reliable and open supply chain and the confidence to trade. This supports global food security. Industry objectives and principles are aligned to deliver and make available a safe food product for delivery into the market.
<p>3 GOOD HEALTH AND WELL-BEING</p>	<ul style="list-style-type: none"> The Australian grain sector is a supportive and inclusive industry that behaves ethically and follows the rule of Law and the rules of Trade. Nutritional value and quality assurance systems mean safe & healthy food supply. Industry objectives and principles are aligned to deliver and make available a safe food product for delivery into the market.
<p>4 QUALITY EDUCATION</p>	<ul style="list-style-type: none"> As a proven and reliable long-term global trading partner the Australian grain sector has a strong focus on industry stewardship and the provision of training to participants within the supply chain including its customers and their consumers. The Grain Industry Code of Practice and the Technical Guideline Documents are openly available to any interested party. GTA Training and Development Program
<p>5 GENDER EQUALITY</p>	<ul style="list-style-type: none"> Legislation (eg Anti-discrimination), regulations, and social consciousness are supportive and attuned to the UN Goal of gender equality. Government & grain industry leaders are aligned and committed to improving the opportunities for women in agriculture.
<p>6 CLEAN WATER AND SANITATION</p>	<ul style="list-style-type: none"> Water resources are used responsibly including the ability to produce grain with in-crop rain and without irrigation. Guide for Growing grain focus on efficient production
<p>7 AFFORDABLE AND CLEAN ENERGY</p>	<ul style="list-style-type: none"> Australia and the grain sector are focused on accelerating electrification, the increase of investments in renewable energy and the development of enabling policies and frameworks. Government & Industry leaders are aligned and committed to sustainability goals and improving and increasing the use of renewables. TGD - Sustainability program principles and guidelines GHG Emissions transport model.
<p>8 DECENT WORK AND ECONOMIC GROWTH</p>	<ul style="list-style-type: none"> Global agriculture and Australia's participation in the grain sector provides benefits, confidence and security of critical food needs that are supportive of a strong and stable global economy. Agriculture and particularly the grain sector provides participants an open, ethical and rules based working environment that will engender and be supportive of career fulfillment and growth. Occupational health and safety Laws and Anti-modern slavery laws and contract provisions.
<p>9 INDUSTRY, INNOVATION AND INFRASTRUCTURE</p>	<ul style="list-style-type: none"> The Australian industry operates in an environment without subsidies and must be efficient to compete in local and global markets. This environment engenders innovation and drives efficient use of capital and resources. The scale of Australia's grain sector also enhances and supports efficiency and the uptake of technology.
<p>10 REDUCED INEQUALITIES</p>	<ul style="list-style-type: none"> Legislation, regulations, and social consciousness are supportive and attuned to this UN Goal. Government & Industry leaders are aligned and committed to reducing inequalities within society.
<p>11 SUSTAINABLE CITIES AND COMMUNITIES</p>	<ul style="list-style-type: none"> The grain industry within Australia is very protective and supportive of its rural communities and works to provide an environment of growth and sustainability for these communities. Global agriculture and Australia's participation in the grain sector provides benefits, confidence, and economic value to the economy and to metropolitan regions.
<p>12 RESPONSIBLE CONSUMPTION AND PRODUCTION</p>	<ul style="list-style-type: none"> Industry and industry frameworks ensure a safe food product, a reliable and open supply chain, and the confidence to the trade of grain between countries thus supporting global food security. The Australian industry operates in an environment without subsidies and is driven by market forces that provide signals to support grain production and its distribution to the market. Guide to Growing Grain outlines sale and efficient production systems.
<p>13 CLIMATE ACTION</p>	<ul style="list-style-type: none"> Urgent and transformative action on climate change is acknowledged by the grain industry as crucial. Individual organisations and companies are challenged and are developing plans and actions to move towards zero emissions. Industry and Government are gaining an understanding of and are measuring emissions to ensure they are limited. Sustainability program principles and guidelines GHG Emissions transport model.
<p>14 LIFE BELOW WATER</p>	<ul style="list-style-type: none"> Urgent and transformative action on climate change is acknowledged by the grain industry as crucial. Individual organisations and companies are challenged and are developing plans and actions to move towards zero emissions. Industry and Government are gaining an understanding of and are measuring emissions to ensure they are limited. Sustainability program principles and guidelines GHG Emissions transport model.
<p>15 LIFE ON LAND</p>	<ul style="list-style-type: none"> Australia as an island nation has a high regard for the marine environment and follows all relevant global protocols and agreed strategies for shipping and for marine biosecurity. The Australian Government is a committed member of the 17-Nation high level panel for a Sustainable Ocean Economy working to accelerate and amplify action to help the world transition to a sustainable ocean economy. Australian grain is used in aqua feed diets and rations.
<p>16 PEACE, JUSTICE AND STRONG INSTITUTIONS</p>	<ul style="list-style-type: none"> The Australian grain industry operates without subsidies, is efficient and able to compete in local and global markets. It provides food security whilst operating sustainably. Australian farmers are efficient and innovative and are focused on the stewardship of the land and the environment they care for and ensure the biodiverse ecological communities are protected and enhanced. Australian industry and Government frameworks promote peaceful and inclusive societies with rules, regulations and society norms all aligned to minimise conflict and insecurity. Rule of Law including Antislavery laws and contractual terms Global agriculture and Australia's participation in the grain sector provides benefits, confidence and security of critical food needs that are required to engender peace and security.
<p>17 PARTNERSHIPS FOR THE GOALS</p>	<ul style="list-style-type: none"> In the current tense geopolitical environment international cooperation and the sustainability of communities is critical. Australia's grain sector is cognisant of building partnerships and is a strong advocate and participant in global associations and trade focused groups. The global associations work to ensure the trade of grain and its global frameworks is supportive of the entry of Less Developed Countries. The Australian grain sector is focused on being a good global citizen and through its open, non-subsidised, ethical, and rules-based frameworks supports global food security, reducing tensions and thereby supporting developing nations growth opportunities.
