

MEDIA RELEASE – FOR IMMEDIATE RELEASE

24 February 2025

AGIC Asia (India) 2025: Complimenting Growth in Mumbai

The Australian Grains Industry Conference (AGIC) Asia is proud to announce its inaugural event in India, set for 9 April 2025 in Mumbai. This first-ever AGIC Asia (India) will bring together key industry leaders to explore opportunities in India’s rapidly expanding agricultural market.

Australia’s grain industry is well-positioned to compliment, and value add to India’s large, diverse, and growing consumer market. As India continues to evolve and seeks global partners to support its needs, Australia is recognised for its expertise in agricultural knowledge, quality assurance, and capacity building to meet the demands of this dynamic economy.

AGIC Asia (India) will build on the success of previous AGIC conferences in Asia, addressing key issues such as:

- Crop quality
- Quality assurance in the supply chain
- Improving processing efficiency of Australian grain
- Trade policy and market access improvement.

The conference will feature a distinguished lineup of keynote speakers, technical experts, and decision-makers, including senior Australian Government officials.

AGIC Asia (India) presents a unique opportunity for stakeholders to network, establish connections with Australian exporters, and engage with India’s key flour and feed processors, consumers, and value chain providers. This event will be pivotal in securing access to the fastest-growing agricultural market in Asia and creating long-lasting partnerships that will drive future success.

About AGIC Asia

AGIC Asia showcases the Australian grain value chain to markets across Asia, promoting trade and strengthening relationships.
