RE: Draft Export Control Bill 2019

Dear Ann,

I write regarding the Draft Export Control Bill 2019 which was open for consultation and follows an extensive review of the existing Export Control Act and related legislation.

1. About GTA

Grain Trade Australia (GTA) is a national association and is the focal point for the commercial grains industry within Australia. The role of GTA is to provide a framework across Industry to facilitate and promote the trade of grain. GTA facilitates trade and works to provide an efficient, equitable and open trading environment by providing leadership, advocacy and commercial support services to the Australian grain value chain. GTA Members are responsible for over 95% of all grain storage and freight movements made each year in Australia. Over 95% of the grain contracts executed in Australia each year refer to GTA Grain Trading Standards and/or Trade Rules.

GTA has established the Australian Grains Industry Code of Practice. All GTA Members are required to adhere to the Code of Practice. GTA Members are drawn from all sectors of the grain value chain from production to domestic end users and exporters. GTA has over 280 organisations as Members. Their businesses range from regional family businesses to large national and international trading/storage and handling companies who are involved in grain trading activities, grain storage, processing grain for human consumption and stock feed milling. A list of GTA Members is attached.

2. General Comments on the Draft Bill

GTA has no significant issues in relation to the content of the draft Bill. GTA is supportive of the draft Bill and its intent of consolidating the array of Acts, Regulations and Orders that currently govern the export of Australia's agricultural exports into a more cohesive framework for the export of Australia's agricultural products.

As previously advised in our response in 2017, GTA appreciates this opportunity to make some comments on the Bill, however, recognises that many of the issues that relate specifically to the grains industry will be dealt with in development of the Rules (see point 3 below).

3. Operational Rules

GTA re-iterates that the operational aspects of the Bill will be defined and included in the "Rules", which are still to be developed as part of the consultation and implementation process. GTA has noted and previously provided a number of issues that require joint industry-Government discussion before implementation into the Rules. We re-enforce our view that the Government ensures there is close consultation with industry around the Rules. This includes:

- Initial development of the Rules and material content within those Rules; and
- Ongoing review and alteration to those Rules, as stated within the draft legislation to be “the responsibility of the Secretary”.

It is the view of GTA that adequate and appropriate stakeholder consultation occurs prior to and during development of any revisions to those Rules, including any changes proposed by the Secretary. This will ensure that the impacts on industry are fully made known to the Government and will reduce the risk that any changes will not negatively impact on the ability of industry to remain competitive on the export market.

GTA has previously provided a list of operational aspects that we consider should be specifically addressed in the Rules, via consultation between Government and industry before being drafted. That list has been attached and where required based on recent industry-Government discussions, updated since initially provided in our 2017 submission.

4. Traceability

As previously indicated on several occasions, GTA is broadly supportive of the Bill and we note that the term “traceability” has not been included. Given previous industry concerns with all aspects related to traceability, GTA looks forward to further discussion on all aspects related to “traceability” during the development of the Rules.

Thank you for the opportunity to provide comments and we look forward to further discussion on the draft Bill and Rules.

Yours sincerely

A handwritten signature in dark ink, appearing to read 'P O Shannassy', with a stylized flourish at the end.

Pat O'Shannassy
CEO

Operational issues identified that GTA proposes form part of the consultation during development of the Rules

1. **Grain Preparation** – GTA notes the intention of the Government to develop a “Grain Preparation Standard”. It is understood this will outline the minimum “requirements” for an exporter to prepare grain for inspection by an Authorised Officer. GTA would question if the definition in the Bill of “Prepare” covers the intent of that Grain Preparation Standard.
2. **Personal Information (e.g., section 387)** – recognising the relevant Acts covering privacy of information, GTA requests that Government consider during the development of the Rules suitable mechanisms or options for assisting industry to adequately communicate and consult on all relevant matters with all grain exporters. For example, GTA does not have access to the official list of exporters as maintained by Government. Access to that list may for example assist in provision of appropriate communication and assist in communication of required standards of practice for exporters.
3. **Goods that are prohibited from export absolutely (Section 23/Trade Descriptions 245)** – GTA would question the ongoing need for the prohibition of split vetch to remain in the draft Bill. Consideration needs to be given to adoption of mechanisms to adequately recognise the commodity to be exported (i.e., split red lentils versus split vetch) and the definition of Prescribed Goods.
4. **Economic consequences for Australia defined as “damage to Australia’s trading reputation”**. We look forward to clarity of this definition being developed between industry and Government during the development of the Rules, given that there are many aspects of this issue that require clarification and defining.
5. **Return of government certificate** – while the Act states the Government MAY require a Certificate to be returned, sometimes this cannot occur as it is impractical. The development of the e-PHYTO and other electronic documentation will need to be considered under this requirement and all other relevant sections of the Bill. The ongoing need for manual documents may also need further consideration when developing Rules on these aspects.
6. **“Grounds for suspension of a property (e.g., section 103/128/406)”** – in general, the grain industry has been frustrated at the ability of the Government to expedite suspension of approval to export for non-payment of scheduled fees or overdue fees. All aspects of suspension/revocation of accreditation should be strengthened, either in the Bill or Rules, to expedite that process where payment is overdue.
7. **Approved Arrangements** – clarification that decisions already made by the grains program will stand. Industry looks forward to further discussion with government on specifics of these arrangements for grain under the Rules.
8. **Audits of “Export Operations”** – during development of the Grain Preparation Standard, industry will be seeking further discussion on the need for continued auditing of all relevant export operations including unannounced audits in order to ensure appropriate compliance with the Act.
9. **Methods for taking, testing and analysing certain samples (section 410)** – the grains industry has and continues to encounter issues with representative samples across a range of markets. This is a critical issue that the industry has been progressing via a “Sampling document” that specifies the methods for obtaining representative samples at all locations along the supply chain. Industry is keen to discuss with Government how that document will be referred to and included in the Rules. Additionally, a review of the approved sampling rate at export will be undertaken as part of that process.
10. **False or Misleading statements about Exports** – further discussion and clarification is required during development of the Rules in regard to how this relates to exporters signing off compliance for each shipment under industry/country specific protocols such as the Wheat/Barley Industry Management Plan for China and the snail management plan for South Korea.

11. **Request for Permit** - current legislation requires all documents are to be completed prior to vessel loading. As identified in the industry Working Group, actions are being implemented to revise processes to more closely adhere to legislation, however, there are circumstances where this cannot occur for every shipment. Discussions are required to identify opportunities to create some flexibility to allow for documents (in part/some) post-sailing to be developed provided that international obligations are met, there are no consequential impacts on other government authorities, the industry focus continues for “100% compliance” and any agreed changes are undertaken on a risk based assessment.
12. **Consistency in Interpretation** – a key focus of the new Legislation is to “remove duplication and provide consistency in export legislation”. While training and other measures have been implemented to create greater transparency and consistency in application of requirements under the Legislation, industry considers further opportunities are available to ensure consistency in interpretation by all Authorised Officers and Plant Export Operations staff when developing the Rules.
