Re: Heavy Vehicle National Law (HVNL) Consultation Regulation Impact Statement (CRIS).

1.0 Introduction

Grain Trade Australia (GTA) welcomes the National Transport Commission's (NTC) Heavy Vehicle National Law (HVNL) Consultation Regulation Impact Statement (C-RIS) and the review of the regulatory environment for heavy vehicles in Australia.

The Australian grain sector is critical to national and rural prosperity providing food security and much needed export revenue whilst generating income and employment opportunities within both urban and rural communities. To maintain and grow productivity in the sector, an effective and efficient supply chain is critical.

2.0 Grain Trade Australia's Role

Grain Trade Australia (GTA) is a national member association and is the focal point for the commercial grain industry within Australia.

GTA has over 280 organisations as members. Their businesses range from regional family businesses to large national and international trading/storage and handling companies who are involved in grain trading activities, grain storage, grain marketing advisory services, processing grain for human consumption and stock feed milling. GTA Members are substantial employers, from the farm gate through to end point consumption, and notably in rural and regional Australia. A full list of GTA Members can be found [here](#) and attached to this submission.

GTA's mission is to 'facilitate trade' in the Australian grain industry. Its products and services, including the Australia Grain Industry [Code of Practice](#), and the [Grain Transport Code of Practice](#) provides a self-regulatory framework across the grain industry to facilitate and promote the trade of grain across the Australian grain value chain.

Within this context, on behalf of its members, GTA provides comment on the Review and the proposed reforms to the HVNL.

3.0 Grain Industry Sector

The Australian grain industry¹ is a major economic contributor in regional Australia and to export revenue, with annual value of production in 2022/23 forecast (excluding rice) to be a record \$31.4 billion at the farm gate and \$30.9 billion of exports², meaning the grain industry is the highest value industry in the agriculture sector, contributing more than 33% of Australia's agricultural gross value of production annually.

The industry achieved record summer and winter production in 2022/23 of 72.3 million tonnes (mmt) following two prior large crops with 68.0 mmt in 2021/22 and 59.9 mmt in 2020/21.

Trade and an efficient supply chain is vital for the Australian grain industry and regional communities, with the Australian grain industry being highly export oriented e.g., 65 -75% of grain is exported.

The grain industry supply chain is geographically diverse and is spread across 31 operational bulk port terminals operated by 18 companies, and multiple container packers and exporters in the 5 major producing States. The Australian domestic market is the largest market for Australian grain and consumed 17.5 mmt of grain in 2021-22³

Producing on average 45 mmt tonnes from approximately 22,300 farms production units⁴ the grain industry has an **inordinately heavy reliance on the transport sector, both road and rail.**

4.0 Feedback on the Proposed Reforms to the HVNL

Firstly thank you for the high-level summary of the issues and options and well as the detailed and well-structured Consultation Regulation Impact Statement (CRIS). The majority of GTA members are participants in the grain supply chain and are heavy users of road transport services. Some GTA members are also owners and operators of heavy vehicles.

GTA has examined the *current consultation focus areas* and have made comment on the proposed reforms in Table 1. In general GTA would agree with the logic that supports the proposed changes. From the examination it appears the reforms and the suggested changes may not have any material adverse impact on the current operations of road freight in the grain industry and they will simplify and clarify areas of concern that transport companies have around Fatigue Management, Access and details relating to the National Audit Standard. *These reforms therefore are welcomed.*

Table 1. Feedback on the proposed Reforms

CRIS Proposal	Overview	GTA Comments
Expanding the scope of fatigue regulated heavy vehicles – Record Keeping	Options are proposed that aim to simplify how record keeping requirements for operators are structured under the HVNL by streamlining requirements, moving them down the legislative hierarchy and giving the regulator more flexibility to change the form and format of fatigue records over time.	Worthwhile modification as it will simplify record keeping.
Expand the scope of fatigue regulated heavy vehicles - FRHV	Expand the scope of fatigue regulated heavy vehicles (FRHVs), such that vehicles over 4.5 tonnes to 12 tonnes are by default considered FRHVs. Currently fatigue rules only apply to vehicles over 12 tonnes	The fleet of transport vehicles that carry grain are not impacted by this modification.

¹ Grains include wheat, coarse grains, oilseeds, oilseed meals and pulses

² Source: ABARES, 2023

³ ACCC – Bulk grain ports monitoring report December 2022

⁴ Grain Growers – State of the Nation 2021

CRIS Proposal	Overview	GTA Comments
Increase to Heavy Vehicle Mass Limits	Currently have General Mass Limit and Concessional Mass Limit. Propose to increase GSM by 5% to equal the CML and to remove CML	This is considered a good simplification and will create greater alignment between jurisdictions.
Increase to prescribed heavy vehicle height limits	Lift the height limit from 4.3m to 4.6m for general access vehicles	The fleet of transport vehicles that carry grain are not likely to be impacted or benefit by this modification.
Increase to prescribed length limits for 19m vehicles.	Increase the length max from 19m to 20m	Whilst unlikely this will benefit the carriage of grain the fleet of transport vehicles that carry grain may receive benefits for other cargoes they carry. .
Improve the National Heavy Vehicle Accreditation Scheme (NHVAS)	Improve the National Heavy Vehicle Accreditation Scheme (NHVAS) based upon a Safety Management System (SMS) approach, and to introduce a new National Accreditation System to support a more robust scheme.	The proposed enhancement to the NHVAS is seen as a valuable step as it will better align the NHVAS to industry safety standards and therefore assist to prepare the heavy vehicle sector to prepare for when the HVNL requires operators to demonstrate implementation of an effective Safety Management System before being accredited under the NHVAS.

5.0 Ongoing Reform Required

The increasing competitiveness of global markets impact the outcomes of the Australian grain industry. Supply chain related innovation is essential to remaining competitive, and requires leadership, planning and capital investment to ensure an efficient globally competitive grain industry for Australia. Similarly global food security is becoming increasingly important and challenging. As conflicts and the environment create concerns and complexity, the facilitation of trade in food between countries and counterparties grows in importance to global food security. The issues around global food security exposes the importance of efficient trade **and supply chains**.

It is critical Government investment, and these structural reforms also advance to ensure supply chains remain robust and responsive to the market demands.

6.0 Conclusion

The Australian grains industry is an extensive user of the national freight network and supply chain and is consequently significantly impacted by its efficiency in terms of costs, investment, regulation and overall productivity.

GTA welcomes this Review and supports its proposed reforms and further focus by Governments on the supply chain and its regulatory environment to ensure the grain industry can continue to provide economic value to the nation as a whole.

Yours faithfully,

Pat O'Shannassy
CEO, Grain Trade Australia
