RE: Submission – Grains/Seeds for Consumption, Feed or Processing import health standard

Dear Rosalynn,

Thank you for considering this late Submission from Grain Trade Australia (GTA). GTA on behalf of grain industry participants would like to provide the Ministry of Primary Industries (MPI) a Submission for consideration on the – Grains/Seeds for Consumption, Feed or Processing import health standard (Standard).

GTA members and New Zealand importers have a long-standing history associated with the import of Australian grain into New Zealand for processing for human consumption and animal feeds. Both our countries enjoy an enviable reputation for agricultural practices and implementation of appropriate procedures to minimise the risk of transfer of pests and diseases of biosecurity concern in imported product.

This GTA Submission refers to existing provisions in the Standard and does not refer to the proposed amendments.

1. About Grain Trade Australia

Grain Trade Australia (GTA) is the focal point for the commercial grains industry within Australia. It facilitates trade and works to provide an efficient, equitable and open trading environment by providing leadership, advocacy and commercial services to the Australian grain value chain.

GTA members are responsible for over 95% of all grain storage and freight movements made each year in Australia. Over 95% of the grain contracts executed in Australia each year refer to GTA grain standards and/or trade rules.

GTA members are drawn from all sectors of the grain value chain from production to domestic end users and exporters. GTA members are involved in grain trading activities, grain storage, human and stock feed milling. A list of GTA Members is attached.

Within this context, GTA provides comment on the Standard.

2. Comments on the Standard

The Standard, for all grain imported into New Zealand from Australia requires a sampling process of:

“representatively sampled with the sample size of five times (5×) ISTA or AOSA guidelines/methodologies. The samples were tested at a NPPO approved diagnostic laboratory and found free from”

GTA members respectfully request consideration to modify the size of the sample required to be tested for weed seeds.

This current requirement under the Standard requires a laboratory test of a five (5) Kg sample. Testing of a sample of this size (based on advice from several ISTA laboratories) is estimated to be on average over \$500 per sample.

A large percentage of grain shipped to New Zealand is by 20-foot container in small consignments. The sampling fee associated with the MPI testing can be a substantive cost that must be considered in the sale price.

Time is also a consideration for GTA members as the time to test a 5 kg sample and to count all the contaminants may extend to a full week of laboratory time. This is because the analyst must remove all the chaff and separate and count every weed seed and other contaminants. Given samples are collected as containers are loaded, they therefore must be held in the shipping terminal until the sampling process, and subsequent provision of Sampling Certificate/Weed Seed Analysis Certificate and the phytosanitary certificate is completed. This results in further cost to the exporter through lengthy delays and can result in serious impacts on the efficiency of the supply chain during peak shipping periods.

Suggested Modification to Sample Size

GTA recommends MPI consider for the common grains imported into New Zealand for processing a change in the Standard to align directly with ISTA rules for purity as per *ISTA Table 2A Part 1. Lot sizes and sample sizes: agricultural and vegetable seeds*.

For the common species shipped to NZ the relevant submitted and working sample sizes have been extracted from Table 2A.

Table 1. Extract from Table 2A

Species	Minimum submitted sample size (g)	Minimum working sample (g)	
		Purity Analysis (3.5.1)	Other seed by count (4.5.1)
<i>Triticum aestivum</i> (wheat)	1000	120	1000
<i>Brassica napus</i> (Canola)	100	10	100
<i>Hordeum vulgare</i> (Barley)	1000	120	1000

GTA would also request that weeds seeds present be listed by species and not be required to be counted as individual items.

By using the revised sampling guidelines, GTA members do not consider that the risk of biosecurity breaches, or an increase in the risk of the presence of weed seeds will occur. In some instances the above practices have been occurring for many years without any detrimental effect on the export of grain to New Zealand nor to our understanding has there been any outbreaks of any unwarranted biosecurity pests and diseases.

In addition, the majority of grain imported into New Zealand is processed in approved facilities and appropriate practices are implemented to manage the presence of weed seeds and comply with New Zealand Biosecurity laws.

Note that the Australian grain industry is currently undertaking a review of sampling procedures at the point of export in conjunction with the Australian Government Department of Agriculture, the body responsible for certification of exports. This review is expected to be completed in 2019 and it is expected to re-confirm the procedures used at loading of grain for export destinations such as New Zealand are appropriate and comply with international guidelines. This should confer additional confidence in MPI that the Australian grain industry understands the risks involved in the international movement of grain while recognising the implications of regulations on the safe movement and trade of grain.

This is an important issue to GTA members and if this change is adopted for grain for processing it will benefit and provide support to the trade of grain between our countries. Note that this request does not relate to seed for sowing.

Please do not hesitate to contact me at any stage during MPI's consideration of this submission.

Yours sincerely,

A handwritten signature in black ink, appearing to read "P O Shannassy".

Pat O'Shannassy
CEO
