1 Purpose of this notice

To advise Members that the Australian Grains Industry Post Harvest Chemical Usage Recommendations and Outturn Tolerances for 2010/2011, has been reviewed and updated with some very minor amendments. The updated Chemical Outturn Tolerances for 2010/2011 has been posted on the GTA website.

2 Background

Australian Grains Industry Post Harvest Chemical Usage Recommendations and Outturn Tolerances 2010/11 document outlines permitted chemicals for use post-harvest and applicable Maximum Residue Limits (MRL) for grain outturned to the Australian domestic or export markets. The MRLs apply for grain outturned during the 2010/11 season.

3 Where can I find the 2010/2011 Outturn Tolerances
