

Member Update**Title: Amendment to GTA Location Differential 2011 2012****Update No.: 21 of 11****Date of Issue: 9 August 2011****1 Location Differentials Amendment****Nhill (ABA) to Portland, Victoria.**

It has come to the attention of the Transport Storage and Handling Committee that Nhill (ABA) Victoria to Portland was entered twice with conflicting distances from port destination.

NHILL (ABA)	VIC	PORTLAND	PORTLAND	ABA	ROAD OR RAIL	251	27.25
NHILL (ABA)	VIC	PORTLAND	PORTLAND	ABA	ROAD OR RAIL	287	30.00

According to the GTA procedure for the development of Location Differentials

LDs are based on a formula of the shortest road distance to port multiplied by a cents per kilometre, per tonne rate as determined by the GTA Transport, Storage & Handling Committee. Road distance to port is determined using Google maps.

Therefore GTA advises Members that the original entry will remain leaving Nhill to Portland at an LD of 27.25.
