

# GTA MARKET NOTIFICATIONS

No. 16 of 20 Topic: Industry notice—Requirements for non-GM certification to India  
Date: 16 December 2020

*DISTRIBUTION: GTA Members – primary contact list. Please circulate to all appropriate internal parties.*

This Industry Advice Notice (IAN) is to advise exporters that from 1 March 2021, some plant products destined for India will require a government-issued non-genetically modified (non-GM) certificate.

## **Summary of changes and key points:**

- Effective 1 March 2021, certain plant products to India will require a government issued non-GM certificate (see [Annexure 1](#) for full list).
- The Office of the Gene Technology Regulator (OGTR) has provided us with the required evidence for these commodities to ensure non-GM certificates can be issued.

Exporters should contact the [Plant Exports National Documentation Hub](#) to request a non-GM certificate.

Relevant [Micor Plants](#) entries will be updated to comply with the new requirement. Full notice can be found on DAWE website:

[2020-75 Plant Export Operations – Requirements for non-GM certification to India](#)
