Table to be Updated	
Canola Classification	Description (what does it mean)
GMO	Genetically modified organism are plants whose genome has been engineered in the laboratory in order to favour the expression of desired physiological traits or the generation of desired biological products. GM Canola types include both those with modified crop production traits (e.g. herbicide tolerance) and those with modified product quality traits (e.g. improved oil quality)
CSO-1a	Approved non-GM, canola quality varieties as listed with specific delivery standards on the AOF website.
CSO-1	Approved GM, canola quality varieties as listed with specific delivery standards on the AOF website.
CSO-2	Approved non-GM rapeseed varieties as listed with specific delivery standards on the AOF website.
RR	GM Canola Plants that have Roundup Ready "Glyphosate" herbicide Tolerance Inbuilt
TruFlex	GM Canola Plants that have Roundup Ready "Glyphosate" herbicide Tolerance Inbuilt with a wider spray window and higher application rates
TruFlex + CL	GM Dual-Stacked Canola Plants that have both GM Roundup Ready "Glyphosate" and "Clearfield" (Non-GM - Imidazolinone) herbicide Tolerance Inbuilt with a wider spray window and higher application rates

Herbicide Technology	Description (what does it mean)
RR	GM Canola Plants that have Roundup Ready "Glyphosate" herbicide Tolerance Inbuilt
CNV	Non-GM Canola Plants that have no specific 'added' herbicide tolerance in the germplasm
CL	Non-GM Canola Plants that have "Clearfield" (Imidazolinone) herbicide Tolerance Inbuilt
TT	Non-GM Canola Plants that have "Triazine" (Atrazine/Simazine - nitrogen-containing heterocycles) herbicide tolerance Inbuilt
CT	Non-GM Dual-Stacked Canola Plants that have

Legend - Wheat

* Indicates a default classification, this system no longer in use
(N) after the variety classification indicates APWN classification for Hard Varieties, APW, AH or APH
