24 September 2024

Ms Ditte Juul-Jørgensen Director-General Directorate-General for Energy European Commission

Via email: ditte.juul-joergensen@ec.europa.eu

Dear Director General,

<u>Grain Trade Australia</u> (GTA) is a national member industry association and is the focal point for the commercial grain industry within Australia. GTA in its role of 'facilitating trade' and on behalf of its members wishes to join and support the Australian Government Department of Agriculture, Fisheries and Forestry (DAFF) recent communication to you regarding the European Commission (EU) additional requirements for the database for biofuels and bioliquids (UDB).

#### 1. About Grain Trade Australia

GTA has over 285 organisations as members (see attachment 1.). Their businesses range from regional family businesses to large national and international trading/storage and handling companies who are involved in grain trading activities, grain storage, grain marketing advisory services, processing grain for human consumption and stock feed milling. GTA Members are substantial employers, from the farm gate through to end point consumption, and notably in rural and regional Australia.

GTA's core focus is to 'facilitate trade' in the Australian grain industry. It's products and services, including the <u>Australia Grain Industry Code of Practice</u>, provide a self-regulatory framework across the grain industry to facilitate and promote the trade of grain within the Australian grain value chain.

Australia's grain¹ is exported by GTA members. A full list of GTA Members in annexed to this submission.

#### 2. Australian trade of Canola:

Australian canola is sought after globally for its use as a food-grade oil, for biofuel production and as a stock feed. Australian canola production is on the rise, averaging more than three million metric tonnes annually, making up 15–20 per cent of the world's export trade<sup>2</sup>. Australia supplies more than 3-4 mmt of canola (15–20 per cent of the world's trade) to Europe, China, Pakistan, Japan and other international markets annually.

Canola is well known for producing one of the world's healthiest vegetable oils and its importance as a low carbon feedstock for biofuel production is growing. Australian canola is grown using sustainable farming systems which are certified as meeting the required sustainability criteria for market access to Europe for use in biofuel. As a result, Australia is a major supplier of canola to the EU biodiesel market with over 2.0mmt exported annually to the EU.

The Australian grain supply chain is sophisticated, market driven and has demonstrated its responsiveness to changes in supply, supply chain shocks and market demands. GTA members facilitate the trade of grain within Australia to numerous domestic demand points and to approximately 100 export market destinations through either trade in containers or in bulk vessels.

<sup>&</sup>lt;sup>1</sup> "Grain" includes cereals, pulses, oilseeds and grain/oilseed-based products (e.g. meal & oils)

<sup>&</sup>lt;sup>2</sup> AEGIC 2024

Australia exports around 70-80% of canola production each year into a globally competitive market, as illustrated in figure 1 below. As such the industry is cognisant of the impacts in terms of costs and higher risk of trade barriers (tariff and non-tariff), government policy and political intervention (including subsidies) in many countries and their impact on efficient global trade. As such the Australian grain industry has a firm view and advocates strongly for risk, science and rules based global trade.

Figure 1 - Percentage of Australian canola production exported

### 3. EU Directive 2023/2413:

The industry also promotes robust and practical rather than highly procedural approaches to trade and trade transactions and is seeking a more practical approach to the significant additional data requirements, as prescribed by Directive (EU) 2023/2413, requiring the establishment of and adherence to the UDB by 21 November 2024.

GTA and its members support the position as outlined by the Australian Government Department of Agriculture, Fisheries and Forestry (DAFF) in its letter dated 9 August 2024 and also wish to request **an extension of time for submitting the required information**.

Further to this GTA also recommends where possible the data requirements should be aggregated to DAFF Export Registered Establishments rather than providing discrete farm level data for each consignment. The Australian supply chain and its storage network has a system that commingles grain ownership at regional accumulation centres. Once commingled specific grain produced on a farm loses its identity and traceability. Farms supplying canola to the European renewable fuel market are all individually identified and certified in accordance with the EU approved scheme, ISCC, with the grain co-mingled and accounted for on a mass balance basis.

## 4. ESG Credentials:

The Australian grain sector is recognised as an industry that is focussed and has a very positive story on sustainability and strong credentials on Environment, Social and Governance (ESG) aspects of the value chain. CSIRO's report, Greenhouse gas emissions from the cultivation of canola oilseed in Australia, looked at the footprint of Australian canola growing at every stage, from fertilisers to pesticide use and found it met the European Commission's greenhouse gas (GHG) savings targets for biofuels entering the EU transportation fuel market.

Our canola farmers are leading the way in demonstrating solid environmental standards and social licence to operate.

GTA has also developed a communication tool titled <u>Australia's grain supply chain and its</u> <u>Environmental, Social and Governance (ESG) credentials</u>. This seeks to illustrate the Australian grain supply chain credentials with respect to:

- Food Safety,
- Traceability,
- Sustainability,
- · People & Safety,
- Food and nutrition quality, and
- Integrity.

This is represented diagrammatically in Figure 2 below:

# 5. Conclusion:

The EU is a valued trade partner for GTA members, and it is hoped this can continue. Please consider the request from GTA members and from DAFF seeking an extension of time to meet the compliance requirements of Directive (EU) 2023/2024.

Please do not hesitate to contact GTA at any stage on this and other grain industry matters.

Yours sincerely,

Pat O'Shannassy

**Chief Executive Officer**
