

MemberUpdate

No. 26 of 2025 • 22 December 2025

TOPIC: National Residue Survey – Industry Performance 2024-25

DISTRIBUTION: GTA Members – primary contact list. Please circulate to all appropriate internal parties.

1. Purpose

To advise members of the outcome of the [2024-25 National Residue Survey](#) and the [Plant Product monitoring datasets 2024-25](#).

2. Background

The National Residue Survey (NRS) operates within the Australian Government Department of Agriculture, Fisheries and Forestry (DAFF). The NRS is an essential part of Australia's pesticide and veterinary medicine residue management framework **providing verification of good agricultural practice** in support of chemical control-of-use legislation and guidelines.

NRS residue monitoring programs monitor the levels of, and associated risks from, pesticides and veterinary medicine residues and contaminants in Australian food products. The programs help to facilitate and encourage ongoing access to domestic and export markets.

Further information on the NRS is available in GTA's [Technical Guideline Document No. 20](#) – National Residue Survey Participation.

3. NRS Results 2024-25

The [2024-25 National Residue Survey](#) indicates a total of 6,289 grain samples were collected for analysis. The results were compared with the Australian standards and export samples were compared with the relevant international standards. In 2024-25, there was further improvement in the **overall compliance with Australian Standards** with the bulk and container export programs and the domestic trade program **all at or above 99.0% in 2024-25**.

The results highlight excellent compliance with Australian standards and demonstrate the strong commitment of the grain industry to good agricultural practice. The consistently high compliance rates help maintain the reputation and integrity of Australian grain in international and domestic markets. The table below, taken from the 2024-25 NRS, highlights the compliance rates for the past five years relative to Australian standards.

Years	Bulk export program		Container export program		Domestic trade program	
	Samples collected	Compliance rates (%)	Samples collected	Compliance rates (%)	Samples collected	Compliance rates (%)
2019-20	2,211	99.7	1,130	99.3	890	97.7
2020-21	3,256	99.9	1,313	99.1	876	98.9
2021-22	4,156	99.9	1,581	98.9	832	99.4
2022-23	5,032	99.5	1,167	96.3	825	98.6
2023-24	4,224	99.7	1,781	98.7	830	99.0
2024-25	3,995	99.8	1,443	99.0	851	99.4

GTA members are reminded that, as per the [Australian Grain Industry Code of Practice](#), industry **MUST participate** in the NRS program as per the export/domestic activities as outlined in the Code. It has been noted that there have been several instances where industry participation has been lacking as per this requirement of the Code.
